

Have a Seat at Our Community Table!

What is HYLO?

Hylo is a web and mobile app that combines group management, messaging, and collaboration, all in one place!

Who does HYLO serve?

Hylo serves folks like us who come together to solve the great challenges of our time! It is a platform to help us build a resilient network together.

Why is HYLO important for Front and Centered members?

You can think of Hylo as a social network just for our coalition members. It's built for communication and resource sharing—to help build our movements and organizations in a members-only space.

How do we use HYLO?

On Hylo you can access and participate in workgroups and committees, learn about funding opportunities, find educational resources, and communicate in real time with the Front and Centered coordination team and other member organizations across our coalition.

Top Hylo Posting Tips

- Only use already available hashtags.
- The megaphone button sends everyone an email in addition to your Hylo post.
- Do not make your post public unless you want folks outside our coalition to see it!
